

RockCurb

A SIKA COMPANY

GENERAL DESCRIPTION

Hanover RockCurb, as marketed by American Hydrotech, Inc. is a hydraulically pressed, concrete, precast curbing piece. RockCurb is available with a battered or bullnose edge and in the standard Hanover Tudor finish and colors, along with Glacier White. RockCurb is finished only on the top and front faces of the unit; the backside and end faces are not finished.

BASIC USE

Hanover RockCurb precast curbing is designed to be used as transition units between the softscape of a Hydrotech Garden Roof® Assembly and the hardscape of an Ultimate Assembly® or anywhere precast curbs are desired.

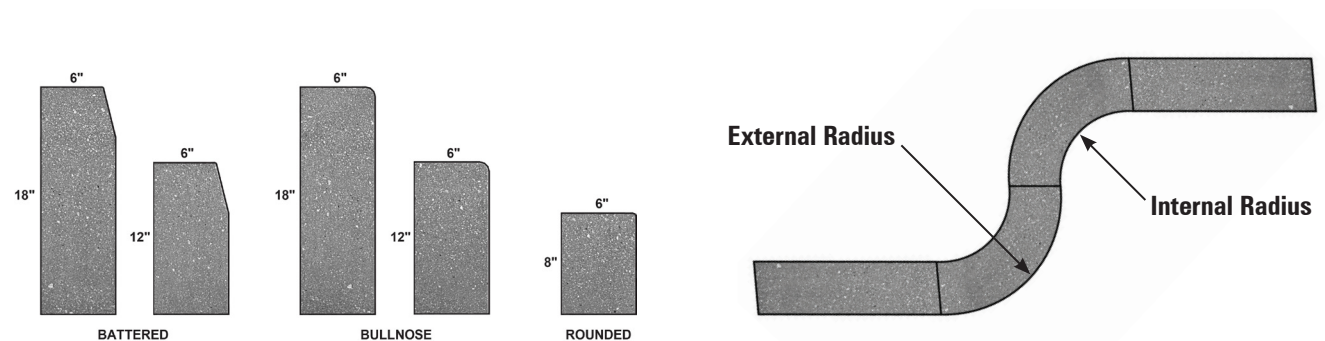

SIZES

- Hanover RockCurb is available 8, 12 or 18 inches high, 6 inches thick/wide, and 36 inches long
- The 8 inch is available with a slightly rounded edge only
- 15° battered, bull nose and rounded profiles available
- RockCurb is also available in a limited number of radius sections as follows:
 - 12 inch high: 5, 10, 15, 20 and 30 foot external radius lengths
 - 18 inch high: 3, 6, 8, 10, 15, 20 and 30 foot external radius lengths
 - 6, 15, 20 and 30 foot internal radius lengths
